

International Management Certificates

Concept

The part-time Management Certificate Programs provide compact and practical state-of-the-art knowledge in different areas of business management. Set in an international context and taught in cooperation with leading US professors, the programs are specially designed for managers with the aim of obtaining a Management Certificate, despite of their limited time budgets. The courses are supported by modern learning methods (blended learning) and are being provided on the following subject areas:

- > **CEO Certificate with focus on the areas of Strategic Management, Marketing, Finance and HR & Leadership.**
- > **Business Strategy Certificate with focus on Strategic Business Management.**
- > **Marketing Management Certificate with focus on Market-oriented Management and Marketing.**
- > **Financial Management Certificate with focus on Finance and Accounting, Controlling and Financial Management.**

Design and Duration

The certificate programs include three units:

- > Intensive onsite seminar (4 or 5 days)
- > Distance learning unit (4 weeks)
- > Independent literature study and project paper (4 weeks)

The overall duration of the certificate programs is at least three months. By considering the individual needs and time frames the program duration can be adapted accordingly.

Program

1. Seminar

The program starts with a five- respectively four-day course:

- > **CEO Certificate:**
Business Development & Global Management (5 days)
- > **Business Strategy Certificate:**
Strategic Management (4 days)
- > **Marketing Management Certificate:**
Marketing Management (4 days)
- > **Financial Management Certificate:**
Financial Management for Executives (4 days)

2. Distance Learning

The distance-learning unit, set in an international context, broadens and deepens participants' knowledge. In addition to their literature assignments, participants take a four-week distance learning course (one evening per week) designed and taught by leading US professors. Participants select one of the following three distance learning modules.

Description module: Business Strategy

This course-module explores the differences between the various managerial strategies and systems used to increase productivity. Participants will learn that organizations can achieve the scale, scope, and efficiency that come from being large and the flexibility, speed, and responsiveness of being small. The course discusses Harvard University Professor Michael Porter's Industry and Competitive Analysis Framework; the importance of core competencies and analysis of the value chain for finding business opportunities.

Description module: Marketing Management

This course is concerned with the adaptation of resources and objectives to outside market opportunity. It covers strategic planning, segmentation, positioning, marketing mix development, and relationship marketing among other viable topics. This course will enable the participant to conceptualize marketing issues and to make viable marketing recommendations.

Description module: Financial Management

The purpose of this course is to familiarize managers with essential techniques and perspectives needed to make sound financial decisions. By completing the assignments and working through the materials, participants should come to understand the difference between economically sound and flawed financial decision analysis.

3. Project Paper (Practical Part)

The practical part of this program ensures that your studies relate to your current professional environment. Participants select a subject or a project and write a 30- to 50-page project paper. The paper should build participants' knowledge and skills in their specific business areas.

4. Certificate

After successfully completing this program, participants are awarded the Management Certificate in their selected area from SGMI Management Institute St. Gallen.
